

# Feedback & Adaptation Prompts

Use these prompts to reflect on and adapt your audit experiment after completion. These can be used individually or in a team debrief session.

## **1. What did we learn?**

- What assumptions turned out to be true or false?
- What new questions did this raise?
- Did we uncover anything surprising or unexpected?

## **2. What impact did the experiment have?**

- Did it help us move faster, increase clarity, or reduce risk?
- Were our success criteria met? Why or why not?
- What value (if any) did this deliver to our audit team or stakeholders?

## **3. How might we adapt or scale?**

- What would we change if we did this again?
- Is there a version of this that could be scaled or reused?
- Are there dependencies, constraints, or governance steps to address first?

## **4. What will we do next?**

- Who needs to hear what we've learned?
- What's our next right step — scale, shelve, or try again differently?
- What's the smallest safe-to-try follow-up?
